Ensure the hardest surface with the best abrasion, mar and impact resistance available. This heavy-duty catalyst helps repel coffee, ketchup, mustard, juice and food stains. It even helps guard against cigarette burns. This catalyst is great for kitchen counters and vanities that tend to attract stains. It works well on a wide variety of materials including bathtubs, Formica, plastic, cultured marble and ceramic tile.

APPLICATION: This Poly-Glass® Stain No More Catalyst is specifically formulated for use with Poly-Glass® resin. For the average job, mix 4 oz. of catalyst to 8 oz. resin (By volume). Thin with 2 to 5 oz. of All Purpose Thinner. Apply a tack coat followed by two even wet coats. Pause in between coats. Air cures water resistant in 48 hours at 75°F. Fully cures in 72 hour at 75°F.

STORE INDOORS BETWEEN 50-90°F

Shake constantly for 15 - 30 seconds before using.
